Adding references

- There are several different ways to add a reference so if you find a different way that is easier for you go with it! To add a reference you click on "Add New Reference" under the body of your paper.

- You can attempt to type in information about your source in the box on the right hand side where it says Search for references or click Create Reference.
To add an in-text citation to your paper

- Go to the bottom of the page (under your paper) and choose the box next to the correct reference (1) and click "cite" (2)

- There will be two questions: Whether your citation is parenthetical or narrative and if you are trying to cite a quote (see picture below). Answer both questions to the best of your ability and hit submit.
